

JoJo Tanks

COMMUNAL WATER SYSTEM

The **JoJo Tanks Water Station** is a communal water system that provides water for human consumption through a manifold with 6 taps.

It is easy to install and perfect for schools, clinics, community centres - any central location where there is no or an insufficient supply of piped freshwater and drinking water. The tank can be filled up with water from a water tanker or borehole. The system has very low maintenance.

FEATURES

1. JoJo water tank installed on a 1.5m high tank stand
2. All pipes and taps are included
3. Anti-theft system on taps
4. Quick couplers on tank and flexible supply pipes
5. All bolts, nuts and pipes are spot-welded for security purposes
6. Wire and turnbuckles to tie tank to stand are included
7. The tank stand:
 - comes completely assembled
 - is painted with red-oxided
 - must be installed in cement
8. **Important:**
 - The JoJo Tanks Water Station is not a mobile system
 - JoJo Tanks are not responsible for the supply of water

(Please follow installation instructions carefully)
